

Welcome to the Morgan High School

Drivers Education Program

Instructors:

Dustin Rock
Aaron Preece
Johny Cain

In order to obtain a Utah Drivers License, a student must complete two parts of the Drivers Education program; the classroom theory portion and the driving portion. A learner's permit must be obtained from the DLD before a student begins the Drivers Education program. Once a student has completed both portions, he/she may obtain a driver's license.

Classroom Theory Portion

The classroom theory portion can be completed one of two ways: through a course offered at Morgan High School, or online through the NUES program.

Morgan High School:

The classroom theory portion held at Morgan High School will only be offered two times throughout the year: during the second trimester of school and during the summer. The state requires students to be in class for twenty seven hours. However, the course will consist of thirty hours – allowing for three absences. The winter course will be held at 6:00 a.m. in Coach Rock's room each school day with the exception of Wednesday due to late start. The summer course will start the first week of June and will run for ten days, Monday through Friday, from 7:00 – 10:00 a.m. Students may register for this course in the office. A student must pay the classroom fee AND have a current learners permit in order to sign up for the class. The fee for the classroom portion will be \$140.

Online:

The classroom theory portion can be completed online using the NUES program. To sign up for this course, students must have a valid permit, and pay the \$160 fee in the office. Once the fee has been paid, office staff will register students for the course. Students will then have ninety days to complete the course.

***Beginning 2017-2018 school year, if a student's birthday is after the October 1st, they will be required to attend the Zero Fatalities presentation with a parent/guardian. The primary goal of Zero Fatalities is to provide awareness and education in an effort to eliminate fatalities on our roadways.**

Driving Portion

Once a student has completed the classroom theory portion of drivers education, they will be placed on the driving list. For online students, a receipt, along with a learners permit, must be submitted to Coach Rock once the course has been completed. Classroom students will be placed on the driving list when ALL classroom assignments are completed. The driving list is organized by birthday and classroom completion date, with an emphasis on students who complete the classroom portion well before their sixteenth birthday. In addition, students must complete the state mandated forty hours (thirty daylight hours; ten night hours) of driving with their parents/guardians BEFORE they drive with an instructor. Once the student begins driving, they will complete the state mandatory amount of driving and observation hours. The driving portion will conclude with the driving test. Once students have completed the driving test with a passing score, they are eligible to receive their license.

Please understand that we, as instructors, do our best to get students driving as quickly as possible. However, obstacles may arise that are beyond our control. Obstacles include, but are not limited to, the following: weather, students not showing up, sicknesses, vehicle malfunctions, etc. Unexpected obstacles may inadvertently affect the driving list. We apologize in advance for any inconvenience this may cause.
